CONTROLS & CONNECTIONS

The functions of Buttons 1-4 are indicated by the icon directly above each button and change depending on the state of the unit.

KEY DASH CAM FEATURES

CONTINUOUS LOOP RECORDING
When the MicroSD Card is full it will overwrite the oldest clips to make room for new footage.

G-SENSOR
A built-in accelerometer senses sudden accelerations or collisions and automatically protects footage surrounding the incident so that it will not be overwritten by Loop Recording.

PARKING MODE
Parking Mode provides security while your vehicle is parked. If the dash cam doesn't sense any motion for a set time the screen will turn off and recording will stop.

If motion is detected or the G-Sensor is triggered, the camera will automatically wake up and start recording again.

Note: Parking Mode is **OFF** by default. You can turn it **ON** in the Video Settings Menu.

INSTALLATION

1

MOUNT

Screw the included suction cup into the mount. Slide the mount into the camera and press the lever to secure the unit to your vehicle's windshield.

2

POWER

Plug the unit into your vehicle's cigarette lighter plug.

3

DRIVE!

When power is applied the unit will automatically turn on and start recording.

Press to stop recording and to start again.

Pressing at any time will capture a still photo.

Press to create an **Emergency Recording**.

Emergency Recordings will not be overwritten by Continuous Loop Recording.

Press to turn the screen **OFF**. The dash cam will continue recording. Press any button to turn the screen back **ON**.

iRadar® APP CONNECTION

The CDR 855 BT uses a Bluetooth® Smart connection to the **Cobra iRadar®** smartphone app. Smartphone integration allows for:

1 Embedding GPS, Speed, Heading, and G-Sensor Information into video footage recorded on the dash cam.

2 Displaying iRadar driver awareness alerts including:

Red Light Cameras

Live Police

Speed Cameras

Caution Areas

Speed Traps

Download the app from the App Store or Google Play.

For iPhone® 4s and later with Bluetooth® Smart:

- Power on your dash cam.
- Make sure your iPhone's Bluetooth is ON. The dash cam will **NOT APPEAR** in the iPhone's Bluetooth Settings Menu.
- Start the Cobra iRadar App. Press the **Menu** button in the upper left of the app and select **Devices**. Follow the onscreen instructions to complete the pairing and connection.
- When complete, a "connected" chime will sound and will turn white on the dash cam display.

For Android™ Devices with Bluetooth® Smart:

- Power on your dash cam.
- Enter your Android device's Bluetooth Settings Menu.
- Scan for Devices and select **Drive HD** to pair.
- Enter the Cobra iRadar App. A "connected" chime will sound, and will turn white on the dash cam display.

COMPUTER CONNECTION

To view videos on a computer connect the dash cam using the included cable.

Select **Connect to Computer** on the dash cam. It will mount as a drive on the computer called **DriveHD**.

Movie clips and photos can be found in the DCIM folder.

Video clips are saved as .MOV files and can be played by most video players on both PC and Mac.

In order to see embedded GPS, Speed, Heading, and G-Sensor information you must view videos using Cobra's **Drive HD™ Player**, which is available for PC only.

Drive HD Player can be downloaded for free at:
www.cobra.com/dashcamsoftware

8

An 8GB MicroSD card comes installed in this dash cam, but it supports cards up to 32GB as long as they are Class IV or higher.
